

Enable Internet Explorer 10 Compatibility Mode

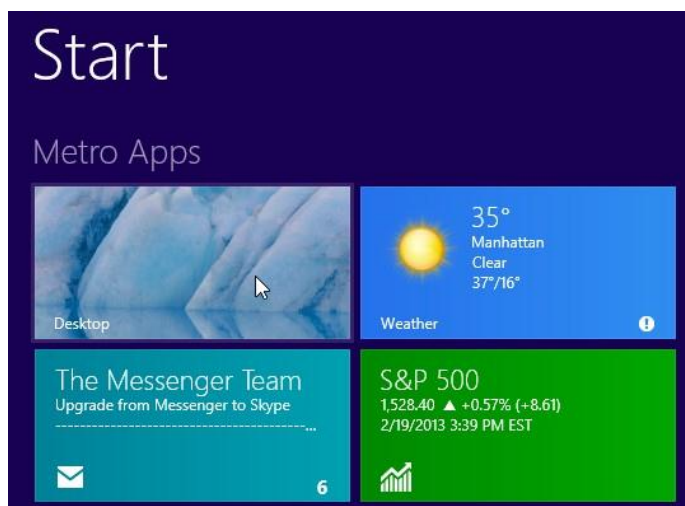

Some versions of Internet Explorer may require the browser be set to compatibility mode for the browser to work correctly. **Internet Explorer 10** on **Windows 7** or **Windows 8** requires that the compatibility mode be set.

If the compatibility mode is not enabled, the progress wheel will simply *spin* without ever taking you to **Lasvegasnevada.gov** or some of the links will not work.

To enable the compatibility mode for **Internet Explorer 10**, follow these steps:

Windows 7 users start at step 2.

1. **Windows 8 only** - From the **Windows 8** start screen select the **Desktop**.

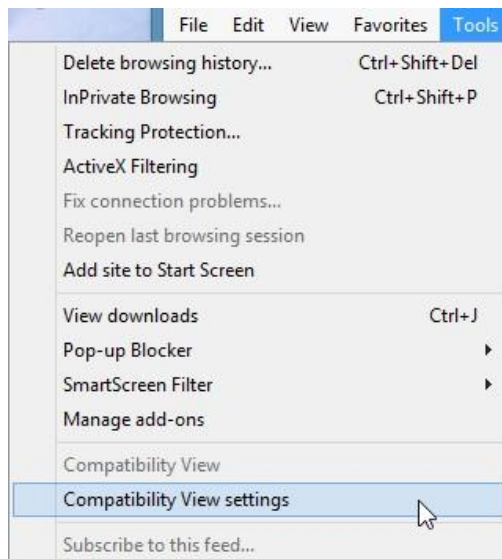

2. From the **Desktop** launch **Internet Explorer 10**.

3. Press the **Alt** key on your keyboard to bring up the top menu.

4. Go to **Tools | Compatibility View** settings

5. Either

- Add **Lasvegasnevada.gov** to the **Compatibility View** websites
or
- Select **Display all websites in Compatibility View**
